

Branches of Chemistry Worksheet

Q1. Hair contains keratin proteins which are also present in nails and wool is an example of:

1. Biochemistry
2. Inorganic chemistry
3. Physical chemistry
4. organic chemistry

Q2. Branch of chemistry dealing with the plantation and overcoming greenhouse effect is:

1. Biochemistry
2. Organic chemistry
3. Environmental chemistry
4. Inorganic chemistry

Q3. The area of chemistry that focuses on the composition of matter:

1. Inorganic chemistry
2. Organic chemistry
3. Analytic chemistry

Q4. Food nutrients belong to which branch of chemistry?

1. Geochemistry
2. Organic chemistry
3. Analytic chemistry

Q5. The study of all chemicals containing carbon is an example of which branch of chemistry?

1. Environmental chemistry
2. Inorganic chemistry
3. Analytic chemistry

Answers Q1. (1) Q2. (3) Q3. (3) Q4.(3) Q5. (2)
